

MODEL SG-40W

Rubber Tire Stump Grinder

The Bandit SG-40W was developed to serve those looking for an aggressive, yet **economically priced stump grinder** with the ability to travel over softer or delicate terrain conditions all while leaving minimal footprint and terrain damage. The SG-40W, features the same proven **cutting performance and productivity** as the SG-40 track, all mounted on a durable drive system with rubber tires.

OPTIMAL VISIBILITY

Operator controls are mounted on a 3-position console. So, no matter the position of the stump, you'll be able to get an excellent view of the grinding action. Two joysticks control the travel of the unit, while a single, easy to use joystick controls all cutterwheel functions. This set-up allows an operator to efficiently control all functions increasing versatility and productivity.

AGGRESSIVE CUTTING ACTION

The SG-40W sets the bar high in this size grinder category. The aggressive belt-driven cutterwheel powers through stumps with ease. Available cutterwheel options include a Bandit wheel with Greenteeth or a New Revolution wheel with hex teeth, allowing users to choose the configuration that best suits their needs.

POWERFUL EFI ENGINE

A Kohler 38 horsepower EFI gasoline engine is easy to start, operate, and provides ample torque to power the cutterwheel through stumps of various sizes.

DURABLE DRIVE SYSTEM WITH FLOTATION TIRES

The self-propelled drive system features flotation tires that power the SG-40W through softer soil conditions leaving minimal footprint. A counter-balance valve is included and prevents the unit from creeping back during grinding.
